**Subject:** RE: Category 4b for Trash

Hi Terry,

The Los Angeles Region has 11 reaches which are on the current 303(d) list for trash and are assessed "4b"

In these waters, trash will be addressed by implementing the trash control provisions of the *Water Quality Control Plan for Inland Surface Waters, Enclosed Bays, and Estuaries of California* through the NPDES MS4 permit applicable to these waterbodies. The trash control provisions require interim milestones and monitoring by the MS4 permittees.

The Los Angeles Water Board will include trash control provisions in a re-issued MS4 permit including the Counties of Ventura and Los Angeles and the Cities of Santa Clarita, San Buenaventura, Oxnard, Port Hueneme, Fillmore, and Santa Paula. The State Water Resources Control Board will include trash control provisions in the MS4 permit for the California Department of Transportation (Caltrans). Complete compliance with the trash control provisions is required by 2030.

In addition, agricultural areas in the watersheds for these reaches are subject to the *Conditional Waiver of Waste Discharge Requirements for Discharges from Irrigated Lands within the Los Angeles Region* which requires best management practices to control trash.

These provisions of the trash control provisions are stringent enough to achieve the standard in the receiving waters.

### Los Angeles Region 4b

	Reach name	Reach description	Cities subject to MS4
1	Santa Clara River Reach 1 (Estuary to Hwy 101 Bridge)	6.06 miles through a watershed which is residential, agricultural and includes the Cities of San Buenaventura and Oxnard	San Buenaventura and Oxnard  County of Ventura
